Beware! This is a horror game and might scare you!
You start in a musty room which is connected to a kitchen. Your goal is to interact with the world around you, and figure out how to win.

A few pieces of information and advice!

1. You can interact with almost everything in every room, but be careful! Not everything is friendly
2. You can approach and tap people
3. You should try to find a key so you can use appliances in the kitchen (HINT: key is located in the lockbox and the password to the lockbox is somewhere in the room)
4. Food can be taken from storage locations in the kitchen. Storage is locked but can be unlocked as long as you take the key with you.
5. Each storage unit has one item of "food" that needs to be taken to use
6. Food can be cooked, heated, blended, etc. by doing a task to a given appliance and then using the appropriate command for each appliance
7. Food can then be eaten, drunk, or spread.
8. In order to win, you must make your way throughout the game and follow the clues within the world around you

Commands (Hint: The commands are put in a specific order to help guide you through the game)

(approach (person))
Go say hi to our friends

(tap (person))
Wow everyone here is so nice.

(view (the poster))
Admire artwork, such as the poster
